Suggested Topics for 1981 Gordon Conference on Elastin

Suggestions for Chairpersons of Session

1. Physical and Chemical Structure of Elastin (includes Tropoelastin)

2. Immunology of Elastin

3. Biosynthesis of Elastin in Organ and Cell Culture including development

4. Molecular Biology of Elastin including Cell-Free Synthesis and Cloning of Elastin Gene

5. Crosslinking of Elastin and Lysyl Oxidase (includes studies on newly discovered proteins containing desmosines)

6. Degradation of Elastin - Elastase and Elastase Inhibitors

7. Involvement of Elastin in Lung Disease

8. Involvement of Elastin in Vascular Disease

9. The Microfibrillar Component of the Elastic Fiber.
